Testing policy for Anatomy and Physiology over 5 years old

**Intent:** Anatomy and Physiology Testing Option for Students who took A&P 1551, 1552, or 1571, 1572 or the course equivalent greater than 5 and less than 7 years prior to the ADN admission cycle.

**Policy:**
This is an alternate option for students who have taken A&P greater than 5 years but less than 7 years prior to admission to the ADN program.

**Requirements for this alternative option:**

1. The student had to have taken the required A&P courses (or equivalent) greater than 5 years but less than 7 years prior to admission application deadline.

2. The student needed to achieve a grade of “C” or higher in the previously approved A&P course(s) in order to qualify for the proficiency option.

**Procedure:**

1. After a candidate has met the requirements necessary for the testing option and this has been confirmed with the Department of Nursing.

2. Dr. Thomas Ruehlmann will be contacted by the student approximately 30 days or more prior to the end of a term.

3. Dr. Ruehlmann will give the student a copy of the syllabi for the appropriate course(s).

4. When the student is ready to take the final exam for the A&P course (1551, 1571, or 1552, 1572), they will contact Dr. Ruehlmann. This should be done at least 10 days prior to the end of the term.

5. Once the student has passed the final exam for A&P I, they should follow steps 2-4 for A&P II.

6. If the student passes both A&P finals exams with a “C” or greater, they would then get credit for taking Anatomy and Physiology; however, the grade the student acquired in the original A&P Classes would be used when calculating admission GPA.

7. The outcome of the testing would be communicated with the Admissions Office via the Department of Nursing so that the student information can be updated appropriately in the admission database.

8. This option may only be used for one admission cycle.
