

# ONLINE LEARNING TIPS

## MAKE THE MOST OF VIDEO LECTURES

### Stick to the course schedule

Staying on schedule will help prevent you from falling behind.

### Take notes as you would if you were in person

Check out the Learning Commons [Effective Note-Taking video](#).

### Find out how to ask questions

Is there a chat feature? Is there a discussion forum? How do you contact your instructor?

### Watch videos at normal speed

Playback speeds of 1.5x can lower your retention and can result in lower assessments. This faster playback speed is worse for complex, multi-step material.

### Close distracting tabs or apps

Humans aren't good at multitasking.
